Viewing a pull request review

You can view all of the comments made in a single pull request review.

You can find a pull request where you or a team you're a member of is requested for review with the search qualifier `review-requested:[USERNAME]` or `team-review-requested:[TEAMNAME]`. For more information, see "Searching issues and pull requests."
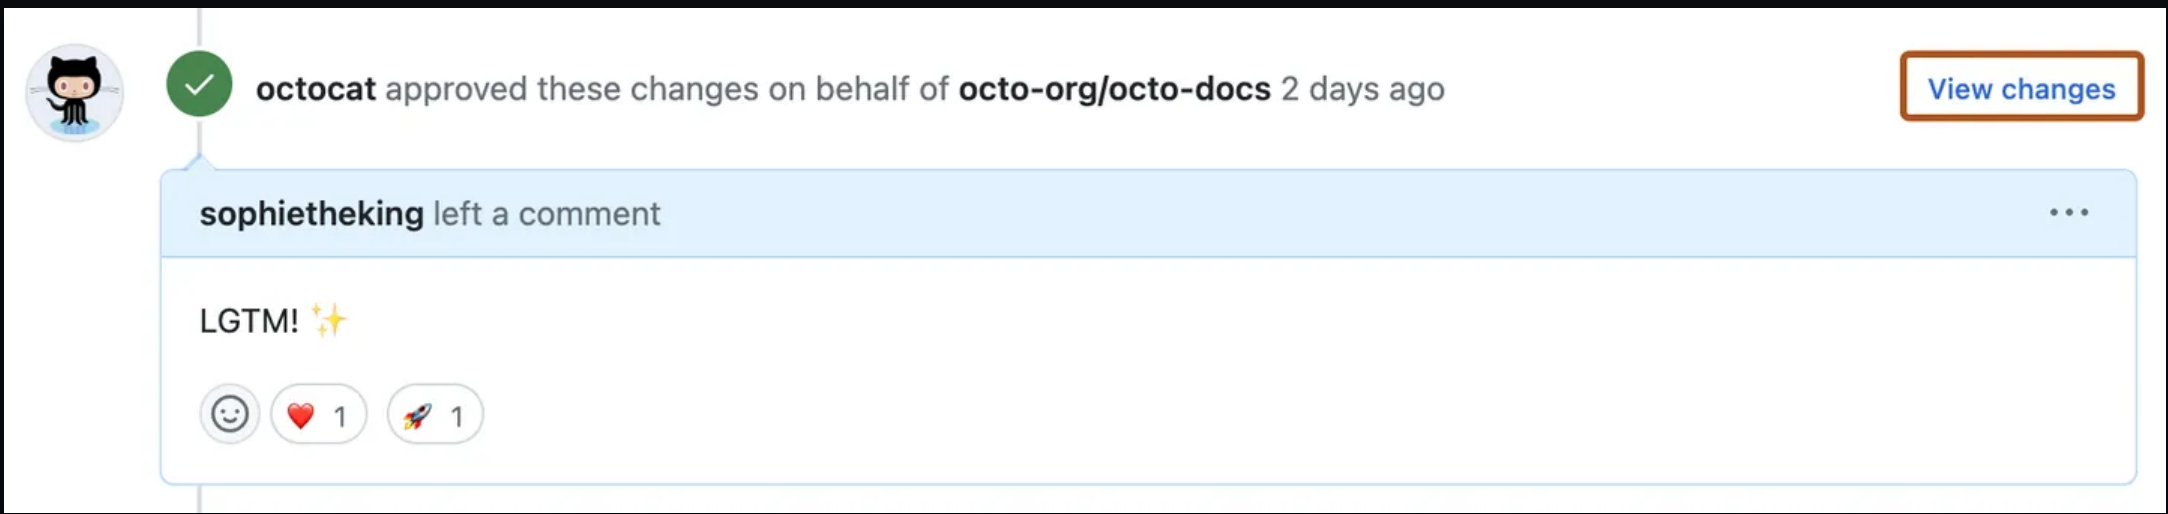

When you view a full review, you'll see the same version of the pull request as the reviewer did at the time of the review.

① Under your repository name, click ⑂ **Pull requests**.

② In the list of pull requests, click the pull request you'd like to review.

③ On the "Conversation" tab, scroll to the review you'd like to see, then click **View changes**.
